[About Red Ribbon Asset Management Plc](#)

Founded in 2007, Red Ribbon is an Indo-British financial services group building on the legacy of historical, cultural, and socio-economic ties between the two countries. As India's global economic role has burgeoned and it looks to a golden decade of growth – following the pattern of China's trajectory template 20 years ago – the UK is shifting into a post-Brexit phase where trading and commercial relationships outside the EU are coming to the fore.

The Group specialises in Mainstream Impact Investment opportunities – these are projects that achieve above market rate returns whilst delivering a measurable, positive social and environmental impact. The company verticals are split into direct investments into Fintech, Construct tech and hospitality as well as fully regulated funds within the jurisdictions of Luxembourg and Gibraltar.
